

Membrane Switches, Graphic Overlays, 3D Dome Labels, Die-Cut Gaskets, Labels, Elastomer Keypads, and More!

We've served our markets with unparalleled customer service, technical support, and stability... for over 40 years!

Process Technology

The key difference at **AGE Nameplate** is our expertise at mixing digital and silk-screen process technologies: We combine the complex graphic capability of digital print with the durability, opacity and color-blending capability of screen print to bring you brilliant Graphic Overlays, Labels and Nameplates.

Color Matching

Color matching is not just a process step – it's a way of life. Every production run is color-matched using color spectrometry and visual expertise to produce color consistency. **AGE Nameplate** is an ISO9001 Registered Manufacturer.

Materials & Specs

We use only the highest quality inks, adhesives and print media to provide products that meet your specifications: Polyester, polycarbonate, pressure-sensitive vinyl and polyester, metals and foams, adhesives, conductive and non-conductive inks. All from world-class suppliers!

Quality Control

AGE Nameplate performs 100% visual inspection of all printed and die-cut products: From Graphic Overlays, Membrane Switches, Labels and Nameplates, to and die-cut gaskets and Elastomer Keypads. All Membrane Switches receive 100% electrical and functional testing.

When do you want to start?

Membrane switches are integrated with LEDs and other surface-mount components, and include embossing, stainless-steel domes, connectors and a Graphic Overlay. **AGE Nameplate** uses high-quality conductive inks and heat-stabilized substrates to ensure low resistance, typically 30~50ohms per circuit (switch). Polyester “poly dome” membrane switches have been tested to exceed 1,000,000 actuation cycles.

Graphic Overlays are the image of your product. In some cases a Graphic Overlay is the **ONLY** way for your customer to associate your Company’s name with the product they will purchase. **AGE Nameplate** produces Graphic Overlays rendering the most simple or complex designs beautifully and with everlasting quality... Because your **IMAGE** is Everything.

Want to add **BLING** to your product? Our list of satisfied 3D Dome Label customers is huge... but we still have room to add your design to our showcase!

At **AGE Nameplate**, we stock a complete line of Gasket and Insulations Materials, EMI shielding, and adhesives. Combine that with our talent for achieving die-cut tolerances of +/- 0.005" (5mils) and you've just found one of the most cost-effective suppliers for all of your custom industrial gasket and insulation needs.

Warning labels, hazmat labels, operating instructions, serial numbers, Company logo, contact information, service and repair labels: These are all an important components of your product. **AGE Nameplate** uses best-in-class materials and print technologies to produce brilliant designs, lasting quality, and visually superior labels.

AGE Nameplate offers customer-specific Silicone Rubber and Polyurethane Elastomer Keypads in any color, with silk-screened or etched text and symbols, carbon-pill actuators, and epoxy coatings for rock-solid durability in industrial applications.
