

Gaskets & Insulators

The heart of technology at **AGE Nameplate**: An innovative spirit and a “can do” attitude are the driving forces that have engineered thousands of custom gaskets and insulators over the past 40 years. Go ahead, push the envelope: Nothing is too complicated for us!

At **AGE Nameplate**, we make custom die-cut Gaskets and Insulations, EMI shielding, and Grounding straps. Materials can easily be combined with/or laminated to our wide selection of adhesives and polyester stiffeners. Insulation materials can include perforations and folds.

Polyurethane, Neoprene and Silicone Rubber
Closed-cell EVA & EPDM Foams
Combination foams Neoprene/EPDM/SBR
Natural Fibrous "Fish Paper"
Fire-Rated Polyester and Lexan FR700
Copper foil

Fire-rated materials are used as insulation around and in-between electronic components and Printed Circuit Boards to help you meet ANSI/UL/ETL requirements for certification. Copper EMI Shielding is provided to ensure your application meets FCC requirements, protect against signal interference, and provide ground paths.
